

Press release:

On the 12th of February 2021, at the facility of RHK Ltd., Spent Fuel Storage in Paks, during the recovery of one of the nitrogen monitoring space, the operating personnel violated one of the limits described in the Operational Limits and Barriers.

The event has no impact on the environment or the personnel. The event was categorised as a stricter INES-1 category -- from the possible ones -- and was reported to the HAEA.
